

We know how powerful access to critical data can be for community-based organizations (CBOs). Data allows organizations to demonstrate the impact they have on the community and can identify gaps in service availability to better address the needs of that community over time.

The Community Organization Dashboard helps you unlock the full value of the Unite Us Platform by efficiently:

- 
Tracking
 your organizational activity
- 
Measuring
 your impact
- 
Identifying
 priority initiatives and growth opportunities

Leverage Insights to Take Meaningful Action

Better understand efficiency and efficacy of the work you and your team do by tracking standard data on operational metrics.

Streamline data collection and analysis to support grant development opportunities and other funding channels.

Boost widespread impact of local partnerships on the community by uncovering gaps and areas of resource overlap.

“With Unite Us, our organization has been able to **increase the number of families we serve by 10x**, while capturing more data to measure our impact!”

– Executive Director, Veterans Bridge Home
