

Interoperability That Powers Connected Care

Unite Us Interoperability connects healthcare, community-based organizations, and government systems so care teams can easily identify patient needs and take action on referrals without leaving their existing workflows.

SUPPORT

Help patients easily find and connect to community resources with flexible options for self-directed care.

STREAMLINE

Reduce duplicate documentation with automated, integrated workflows.

ACT

Connect patients to accountable community-based organizations that can meet their needs.

EHR and Case Management Integrations

Access Unite Us workflows directly within your EHR or case management system. Screen for social needs, send and track referrals, and gain detailed insights at the point of care.

eClinicalWorks

HEALTHEDGE

MEDITECH

ORACLE

Don't see your system? Unite Us offers flexible API and SMART on FHIR integration options. [Contact us](#) to learn more.

Spotlight on New Hampshire

"The NH Department of Health and Human Services is excited to build regional networks throughout New Hampshire to create a statewide coordinated referral system that will help everyone in New Hampshire access the services they need to thrive."

– NH DHHS Commissioner Lori Weaver
