

# Building healthier communities together

## We connect health and social care.

Unite South Dakota is a coordinated care network of health and social service organizations. Partners in the network are connected through Unite Us' shared technology platform, which enables them to send and receive electronic referrals, address people's social needs, and improve health across communities.

## Network partners can:

Easily **refer and connect** your clients to local resources.

**Increase efficiency and capacity** with secure, smarter referrals.

**Measure the impact** of your organization and the services you deliver.

Improve your clients' well-being through access to a **variety of services**.

**Track outcomes** of all referrals and services delivered to your clients.

Identify gaps in needs to **proactively address barriers to care** and increase health equity.

## How does it work?

Anna shows up at Sue's organization.

### Screening

### Referral

### Resolution

### Feedback

Sue screens Anna and identifies that she has additional needs.

As Anna receives care, Sue receives real-time updates and tracks Anna's total health journey.

- Sue uses the Unite Us Platform to gain digital consent and electronically refer Anna to multiple community partners. Through the platform, she can seamlessly communicate with the other organizations and securely share Anna's information.

**Join a network of:**

housing associations

education providers

transportation providers

food pantries

reentry programs

health care providers

utilities assistance providers

financial assistance programs

government agencies

and many other types of organizations  
focused on improving health outcomes in  
your community.

**Built in Partnership With**
