

Building healthier communities together

We connect health and social care.

Unite Arkansas is a coordinated care network of healthcare providers, government agencies, and social service organizations. Partners in the network are connected through Unite Us' shared technology platform, which enables them to send and receive electronic referrals, address people's social needs, and improve health across communities.

Network partners can:

Easily **refer and connect** participants to local resources.

Improve individuals' well-being through access to a **variety of services**.

Increase **efficiency and capacity** with secure, smarter referrals.

Track **outcomes** of all referrals and services delivered to participants.

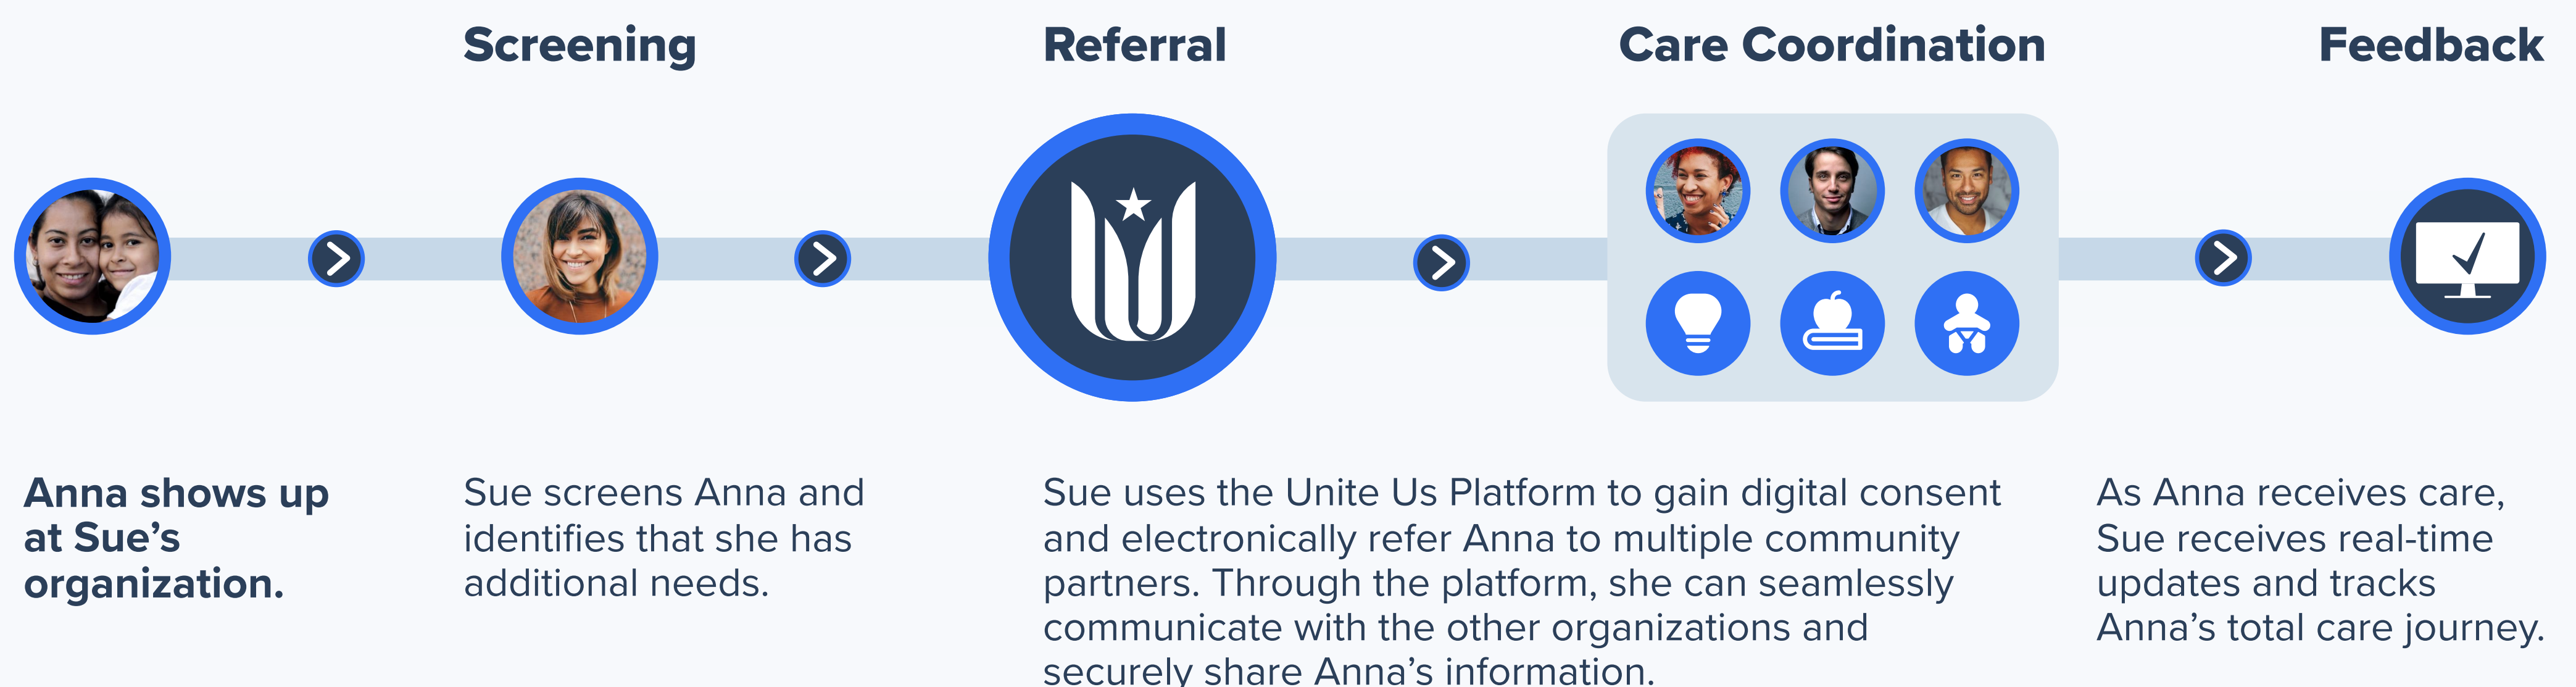

Measure the **impact** of your organization and the services you deliver.

Identify gaps in needs to **proactively address barriers to care**.

How it Works
